1. Façade Garden

Hardy perennials lining the front of our hotel include hosta, foxglove + delphiniums in back and cosmos, pansies + violas curbside, creating a glorious showy garden.

2. Durant Avenue Garden

Bright, flowering perennials + showy annuals create a blooming area to welcome hotel guests and passersby.

3. Element 47 Garden

Inspired by the Highline in New York City, beautiful perennials provide an abundance of blooms. This garden also provides food for butterflies and insects.

4. Hillside Garden

Shade-loving plants like ferns, hostas and lilies fill this sloped garden. White annuals ensure this garden looks bright + beautiful morning, noon and night. Hummingbirds often visit these flowers to collect their afternoon nectar.

5. Courtyard Garden

From the indigenous columbine, Colorado's state flower, to non-native Asiatic Lilies, this garden features a variety of flora lining our living wall.

6. Living Wall

As the showpiece of our courtyard garden, this radiant display of flowers changes motifs each season. This year's theme is "A River Runs Through It." We invite you to share your living wall photos on Instagram + tag them @thelittlenell #nellgardens.

7. Edible Organic Garden

Our pastry chefs rely on this garden for edible flowers to use in their confections, while herbs and the occasional tomato are grown for element 47.

8. Dahlia Garden

Locally grown dahlias fill these flower beds, which are used for fresh cut flower displays. The blooms can grow to be as large as dinner plates.

9. Ajax Tavern Lavender Garden

Lavender grows in this sun-soaked garden, creating a wonderful aroma in the air and plentiful food for butterflies and bees. This very same lavender is also used for sachets presented to guests during summer stays.
